

Group	Type of the plant	The incentive price C (kn/kWh)
The plant with installed capacity > 5 MW		
2.a.	hydro power plants	RC
2.b.	wind power plants	RC
2.c.	solid biomass plants including biodegradable ind. and municipal waste	RC
2.d.	biogas power plants from agricultural plants and organic remains and waste from agriculture and food processing industry, landfill gas power plants and power plants using gas from water treatment plants	RC
2.e.	liquid biofuel power plants	RC

For all power plants, with the incentive price of RC, for each accounting period of the incentive payments will be paid the amount of currently valid RC. RC referred to Article 5. paragraph 5 presents a valid RC at the time of signing the contract for the purchase of electricity and changes in accordance with the methodology set out in Article 3 Paragraph 2 item 16 Tariff System.

RC - reference price of electricity (Article 3, paragraph 2, item 16) - price is equal to the amount applicable tariff rates for active energy at the unique daily tariff for supply of electricity within the universal service, tariff model Blue which is the amount specified in Article 39 paragraph 2 Item 1 Methodology for determining the amount of tariff items for electricity supply within the universal service ("Official Gazette", 116/2013), according to which suppliers are obliged to buy electricity from renewable energy sources and cogeneration from HROTE.
